

Serving Humanity Since 1957

“ TO KEEP THE BODY IN
GOOD HEALTH IS A DUTY...
OTHERWISE WE SHALL NOT
BE ABLE TO KEEP THE MIND
STRONG AND CLEAR.

- BUDDHA

”

ABOUT US

Founded in the year 1957, Hindustan Syringes & Medical Devices Ltd. is a high volume capacity manufacturer of cutting-edge medical devices for a highly demanding global market. HMD has set a benchmark when it comes to manufacturing a plethora of medical disposables, thus aiding medical experts to save and sustain human lives across the globe. All products manufactured at HMD plants are marketed through a highly responsive national distribution network, comprising of more than 4500 authorized dealers, ensuring ready availability of every product from their inventory, even in the most secluded of the areas, backed up by value-adding customer support.

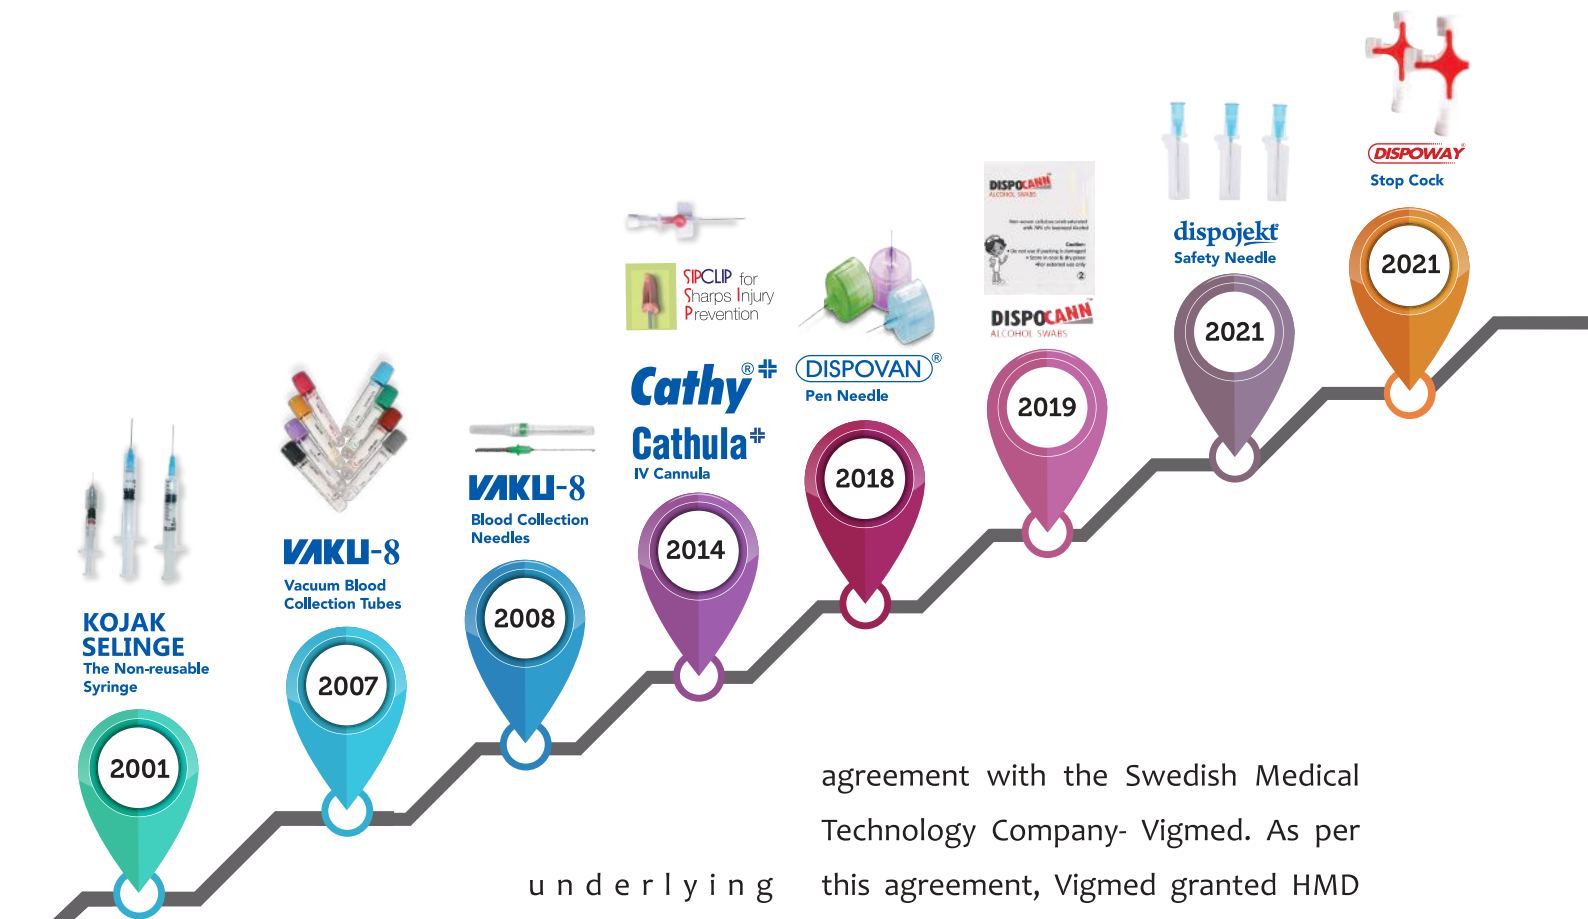

OUR JOURNEY

Founded on 2nd August 1957 and formally inaugurated on 4th January 1959, Hindustan Syringes & Medical Devices Ltd. was conceived to cater to the emerging needs of the Medical Profession across the Globe. Honoring the vision of our Founder, Late Mr. Narindra Nath Ji, HMD was created to serve Medical Profession with affordable, World Class Medical Devices aiming to secure a predominant position in the global healthcare industry by harnessing research, technology & manpower for the better good of mankind whilst promoting patient safety. The idea was to manufacture & market products of International Standard and offer them for the benefit of patients

and doctors at prices that any other local manufacturer would find difficult to meet without compromising on quality. It was the very first technical collaboration between a Japanese Corporation & Indian MSME set up to produce Glass Syringes in the year 1959 and subsequently adding other products such as Surgical Blades in 1971, Single Use Syringes in 1986 and so on. Since innovation is one of the main pillars of HMD's philosophy, aiming to offer constant quality medical consumables to a demanding market is our

u n d e r l y i n g objective. Thus, catering to this commitment effectively, HMD had set up a state-of-the-art manufacturing facility in 2001 for manufacturing K1 Design Auto Disable Syringes for which HMD Collaborated with M/s. Star Syringe Ltd., (UK based company founded by Mr. Marc Koska (Inventor). The Auto Disable Syringe now goes by the brand name, Kojak Selinge. Speaking of collaborations, HMD also joined forces with M/s. Estar Technology, Israel, and launched the Vaku-8 brand of Evacuated Blood Collection Tubes ensuring accurate blood collection in a safe closed system so there is no risk of blood exposure. Subsequently, HMD signed an

agreement with the Swedish Medical Technology Company- Vigmed. As per this agreement, Vigmed granted HMD the right to utilize Vigmed patents on non-integrated Safety I.V. Catheters and to also market these products under HMD's brand in selected markets. Thereafter, in 2018, Hindustan Syringes & Medical Devices Ltd. launched India's First Insulin Pen Needle. The high precision engineered and technologically advanced, yet affordable, Insulin Pen Needle aimed to offer a less painful injection whilst further discouraging reuse of Injection. HMD reiterated its global vision and long term goal of becoming "Top 5" in each of its business segments by building a unique competitive advantage in key businesses.

STRIVING FOR EXCELLENCE IS OUR COMMITMENT

Our journey of striving for excellence continues to surge ahead as we look forward to achieving a credible space in the global healthcare industry. The MDSAP, CE and ICMED certifications earned by HMD have been pioneering milestones for an Indian manufacturer that have got us immense acknowledgement and recognition in the

international medical device community today. Most of our medical devices are ranked amongst the top five World Wide in their respective categories. With our mission to serve humanity and our high-quality credentials, we are all set to increase our global market share many folds in the future.

SERVING HUMANITY IS OUR MISSION

Having built a reputation for striving for excellence in making world-class sterile medical devices, HMD is known for its value driven philosophy of striving for zero tolerance in quality and in its consistency, deploying quality measurement tools under 6-sigma. The strong foundations of our company have been laid on trust, commitment and performance. Adhering to the strict global norms

of precision, we take pride in our state-of-the-art production technology to manufacture products that conform to the most strict international standards. We are always committed to serve humanity across the globe with the latest cutting edge technological advancements in sterile medical devices at an affordable cost for the patients.

HYPODERMIC SYRINGES

STERILE SINGLE USE SYRINGES

"Ribbon" Packed Dispo Van, Unolok single use syringes with out needle & with needle mounted on top, are synonymous with quality.

COMPONENTS :

BARRELS AND PLUNGERS: Made of non-toxic, medical-grade polypropylene compatible with the medication for short term contact drug delivery application. The nozzle of the barrel is of two types - luer mount and luer lock. Both have a 6% luer taper as per ISO:80369-7.

GASKETS: Made of natural Rubber/Thermoplastic Elastomer which is chemically inert and compatible with the medications for short term contact drug delivery application*.

LUER LOCK nozzle present in UNOLOK syringes ensures a secure needle fitment*.

PACKING: DISPO VAN, UNOLOK single use syringes are individually Ribbon packed in a double-laminated plastic film & transparent thermoformed peelable Blister pack.

AUTO DISABLE SYRINGES

KOJAK SELINGE

Auto Disable syringe for patient safety in the curative as well as immunization sector, a syringe that breaks automatically if you try to reuse it.

COMPONENTS :

BARRELS & PLUNGERS : They are made of medical grade polypropylene that is non-toxic & compatible with the medication for short term contact drug delivery application.

GASKETS: They are made from natural Rubber/Thermoplastic Elastomer are chemically inert & compatible with all kinds of medications for short term contact drug delivery application.

LOCK: Presence of ring and lock mechanism which automatically breaks the plunger, if reuse is attempted.

NEEDLE : The tip of the needle has a thin wall and 3 facet lancet point. Needle is well siliconized to reduce friction (for smooth penetration & withdrawal).

PRECAUTIONS : Before use, check the integrity of the sealing of the pack. Do not push the plunger forward before withdrawing medicament from the vial otherwise plunger will get locked.

KEY BENEFITS OF KOJAK SELINGE:

- Significantly helps in reducing infections due to unsafe injections.
- Reduces health-care costs at a macro-level.
- Reduces average stay of patient in hospital.
- Usage of fixed needle syringes assures that neither syringes nor the needle can be used again, thereby promoting patient safety.

INSULIN SYRINGES

Diabetes Safeguard

STERILE SINGLE USE INSULIN SYRINGES

Dispo Van & Unolok Insulin Syringes are manufactured on totally automated printing, assembly and packaging lines as per the requirements of the most stringent quality standards. All the needles are siliconised to minimize pain.

Presence of low dead space avoids wastage of medication and ensures accurate dosage.

COMPONENTS :

BARRELS, PLUNGERS, NEEDLE COVERS AND BOTTOM CAPS (MULTIPACK) : Are made of non-toxic, medical grade polypropylene compatible with the medications for short term contact drug delivery application.

NEEDLE : It comes integrated with the barrel.

GASKETS: They are made from natural Rubber/ Thermoplastic Elastomer are chemically inert and compatible with all kinds of medications for short term contact drug delivery application.

PRINTING: Graduation scale is available with U-40 and U-100 versions.

1ml is available in both U-40 and U-100, 0.3 ml available in U-100.

PACKING: Insulin syringes are unit packed in a double laminated plastic film/Blister pack.

Insulin syringes are also available in an economic multipack of 10 units in a double-laminated plastic film.

INSULIN PEN NEEDLE

Precision Engineered
Affordable

WHY REUSE A PEN NEEDLE, WHEN DISPOVAN MAKES IT AFFORDABLE FOR SINGLE USE?

FEATURES IF PRECISION ENGINEERED DISPOVAN STERILE SINGLE USE PEN NEEDLE:

- Extra thin wall
- Ergonomic shape for improved skin contact and grip
- Multi-level, tapered point
- Flat base designed to improve skin contact and comfort

SAFE DISPOSAL IS IMPORTANT:

- Discard it right away in a sharp container for medical waste (to prevent anyone from getting infected with your used pen needle)

CAUTION:

- Check the compatibility between the pen needle and the pen to be used for administering medication.
- Always mount a new needle before each injection and dispose it of after single use.
- Use the technique recommended by your doctor for administration.
- Store in a clean dry and insect free place.
- Avoid exposure to acidic/corrosive fumes to avoid corrosion/rust.

WARNING :

- Do not use if the pack is previously opened or damaged, needles should be discarded preferably in a sharp container.
- Do not attempt to re-sterilize and reuse.

PRODUCT RANGE

Gauge	31G	32G	31G	32G
Needle Length	5mm 3/16"	4mm 5/32"	5mm 3/16"	4mm 5/32"
Packaging	Pouch Pack	Pouch Pack	Box Pack	Box Pack
Reorder No.	04136	04135	04138	04137

HOW TO USE DISPOVAN PEN NEEDLE?

Step 1 :
Take a new needle, peel of the paper bag

Step 2 :
Push the needle straight onto the pen. Rotate until it is on tight

Step 3 :
Pull off the outer cap and keep it for later. You will need it after injection to safely remove the needle from the pen.

Step 4 :
Pull off the inner needle cap and throw it away. if you try to put it back on, you may accidentally stick yourself with the needle. A drop of the medicine may appear at the needle tip. This is normal, but you must still check the flow.

HYPODERMIC NEEDLE

Hypodermic Kit

STERILE SINGLE USE NEEDLE

Manufactured using premium-quality cold-rolled stainless steel strips with the latest Japanese technology, Dispovan and Unolok needles are ground on high-precision machines; assembled and packed on totally automated machines. Vision cameras ensure 100% automated quality control, enabling superior sharpness for comfortable insertion.

COMPONENTS:

NEEDLE HUB: Made of non-toxic, medical-grade Polypropylene compatible with the injectable medication and has 6% Luer Taper as per ISO:80369-7.

CANNULA : BURR FREE - 3 FACET LANCET POINT are made from SUS 304 stainless steel.

PACKING : The needles are packed in tamper-evident blister packs having easily peelable, medical-grade paper which ensure reliability of seal and product sterility.

PRECAUTIONS:

- Before use, check the integrity of the sealing of the pack.
- Store in clean Dry & insect free place.
- Avoid exposure to excessive heat.
- Avoid exposure to acidic/corrosive fumes, to avoid corrosion/rust.
- Avoid piercing the needle through the wall in hard plastic container, it may result in needle blockage.

COLOUR CODE : As per ISO:6009.

SAFETY NEEDLE

SHARP INJURY PREVENTION

FEATURES OF DISPOJEKT SIP SHIELD

- Compact Needle with a safety cover
- Transparent safety mechanism activated by one hand.
- Audible click sound confirm locking of safety device
- Does not require a change in injection technique
- Sharp three - beveled needle to minimize discomfort
- Siliconized needle minimized penetration and gliding force
- Colour coded hub to conform to ISO 6009
- Available in 22G, 23G and 24G.
- Available in thin wall regular bevel.

INTENDED USE

- Used with syringes for single use hypodermic / intravascular / intramuscular injection.

PACKAGING DETAILS

The Dispojekt single use Safety Needle with SIP (Sharps Injury Prevention) are individually packed in transparent thermoformed peelable blister pack as a strip of five pieces.

CAUTION:

- Reuse of product may lead to cross contamination / infection.

WARNING:

- Do not use if the pack is previously opened or damaged.
- Do not attempt to re-sterilize and reuse.

STORAGE CONDITIONS:

- Store in clean, dry & insect free place.
- Avoid exposure to acidic / corrosive fumes to avoid corrosion /rust.

I.V. CANNULAS

Cathy STERILE SINGLE USE I.V. CANNULAS

with & without Injection port and safety features also. With the new VOLEX proprietary polymer, Cathy I.V. Cannulas make a technological leap into the future of medical care.

PAIN ADVANTAGES

- Minimal intimal irritation and risk of Phlebitis.

COMPONENTS :

WINGS: Wings are made of non-toxic medical-grade polypropylene. Incorporates a flash-back chamber in the hub, blood stopper and luer lock cap.

Cathy SAFETY I.V CANNULA WITH SIP CLIP™

The auto protection technology of Cathy+ I.V. Cannula is designed to provide 'Involuntary Activated Safety' due to presence of a protection device SIP CLIP which encapsulates the tip of the used needle when introducer needle is extracted from the Catheter; Post Cannulation. prevents accidental needle stick injury.

Cathy NEO WITH "INSTANT FLSH BK" EASES CANNULATION, REDUCES ANXIETY

For neonates and children, in 24G & 26G I.V. Cannula, a notch has been provided in the needle for "INSTANT FLSH BK" (instant flashback visualization) at the tip of the catheter. It assists in achieving successful Cannulation in 1st attempt of vein entry.

I.V. CANNULAS

A range of I.V. CANNULA, each designed to meet Specific application of cannulation **KITKATH+ with radiopaque FEP Fluro Ethylene Propylene)** offers safe & convenient method of infusion.

FEATURES

- 2way/lway I.V. Cannula with wings.
- It is provided with low pressure Injection valve to facilitate extra medication and to prevent its back flow.
- Medicine can be Injected by syringe without needle thereby reducing chances of Infection and preventing needle stick Injuries. Cost of needle is also saved.
- The Valve is protected with easy to open Injection Port Cap.
- Angled & grooved wings offer easy fixation and prevent shifting & rolling of cannula in the patient's body.
- Disposable, sterile, non-pyrogenic and nontoxic.

PRODUCT RANGE

Colour Code	Gauge	Catheter Ext. Diax Length (mm)	Water flow-rate (ml/min)

Yellow	24G	0.7X19	16/22
Violet	26G	0.6X19	12/15

- Also available in other FEP brands.
- Conform to : ISO 10555-1 & ISO 10555-5 standard.
- ▲ Before use check the integrity of the sealing of the pack, if the pack is previously opened or damaged then do not use.

COMPONENTS

CATHETER:

- Cannula is made of virgin FEP (fluro Ethylene Propylene) double tapered bevelled tip, siliconised catheter with radiopaque strips.
- The double-tapered formation of catheter and bevelled tip of Cannula is designed to reduce trauma and peel- back.
- High resistance to kinking without compromising biocompatibility.
- Minimum resistance during insertion due to low coefficient of friction.
- High chemical resistance reduces the chances of thrombogenicity.
- Thin wall of the catheter allows maximum flow rate for a specific gauge of cannula.
- Optimum trim distance to minimise the problem of 'peel back'.

CAUTION :

- Needle extra sharpness and thin catheter wall requires lower force and less angle to body during cannulation to avoid cross puncture of vein.
- For low blood pressure patients 2-3 seconds required for blood to reach flash back chamber of needle hub.

SCALP VEIN SET

Infusion Therapy Equipment

STERILE SINGLE USE SCALP VEIN SETS

Moulded from non-toxic medical-grade PVC. compound and assembled on totally automated assembly machines. Needle points are inspected by electronic vision camera systems for removing blunt, damaged points to ensure that Scalp Van and Unolok Infusion Sets are comfortable.

COMPONENTS :

LUER ADAPTOR: Made of non-toxic, medical-grade polyvinyl chloride compatible with any injectable medication, have a 6% luer taper as per ISO:80369-7.

WING: Made of medical-grade flexible PVC. and are colour-coded for instant identification of the desired gauge.

LINK TUBE: made of kink-free, non-toxic, medicalgrade flexible P.V.C

CANNULA: Burr-free 3-facet lancet-point are made from SUS 304 or equivalent stainless steel.

PROTECTIVE SHIELD in **UNOLOK** assists in ensuring there is no secondary needle sticks and no reuse of device.

UNOLOK infusion sets are provided with LUER LOCK connectors.

PACKING: The Scalpvein sets are individually packed in transparent. thermoformed, peelable blister-packs.

BLOOD SAMPLING SYSTEM

Blood Collection Equipment

VAKU-8® VAKU-8+ BLOOD COLLECTION SET

with safety shield, offer the ideal solution for accessing difficult veins for blood sampling by utilizing the wings to control needle placement. The wings ensure no trauma due to the rolling of the needle and minimize chances of vein perforation. Distal vein wall puncture aside from causing patient discomfort due to repeated pricks, can result in increased chances of Phlebitis and other related problems.

A non latex rubber sheath envelops the needle of multiple sample adaptor, automatically retracting as the needle penetrates the vacuum tube stopper and upon withdrawal, recovers the needle. This sheath helps in avoiding accidental needle sticks to personnel using it, as well as avoiding blood spillage.

With VAKU-8+ there is a safety shield for covering the needle post use to prevent accidental needle stick injuries.

UNDER COMPONENTS :

FLEXIBLE WINGS: Their textured surface easily pinch together to provide a secure grip.

NEEDLE: With short bevel, minimises chances of vein perforation.

KINK-RESISTANT TUBING: They assure continuous flow.

FEMALE LUER LOCK: For secure fitment.

SELF SEALING NON LATEX PROTECTION SHEATH:

Automatically covers needle before & after insertion.

PROTECTIVE SHIELD in VAKU-8+ ensures there are no secondary needle sticks and no reuse of device.

SCREW THREADS: They can fit in any standard vacuum tube holder.

BLOOD SAMPLING SYSTEM

COMPONENTS:

TOP NEEDLE COVER: Top cover are made of medical grade PP. It give protection to needle from damage.

LOWER NEEDLE COVER: Lower covers are made of medical grade PE.

NEEDLE TUBE: Needle tube is made from cold roll stainless steel. The needle tube is thin walled which allows a larger internal diameter resulting in improved flow rate.

NEEDLE TUBE SHEATH: Flexible rubber tube covers the backside of needle tube. This act as end blood stopper when is withdrawn from sample tube.

SILICONISED NEEDLE: To minimize trauma and with short Bevel to minimize risk of vein cross perforation.

WARNING: Do not use if the pack is previously opened or damaged. Ensure that blood collection tube is fully pressed over the blood collection needle. Do not attempt to re-sterilize and reuse. Blood Collection Needle should not be recycled and should be disposed off preferably in sharps containers.

BLOOD SAMPLING COLLECTION SYSTEM

Evacuated (Vacuum) Blood Sampling Collection Tube Systems

With the Vaku-8 evacuated blood sampling collection tube system, the blood is collected directly into the tube during the venipuncture procedure and is a closed system. With the syringe method, the blood from the syringe must be transferred into test tubes after collection and is an open system. Vaku-8 reduces risky blood exposures to phlebotomist and need to transfer blood to test tubes by Lab technicians and consists of disposable needles and tubes.

Bi-CAP

A Bromobutyl rubber stopper that seals Vaku-8 Blood Collection Tubes. It is covered by a plastic cover to help protect laboratory personnel from contact with blood on the stopper or around the outer rim of the tube.

TYPES OF BLOOD COLLECTION TUBES WITH BI-CAP

GEL + BCA TUBE FOR SERUM COLLECTION

ESR TUBE FOR WHOLE BLOOD COLLECTION

NO ADDITIVE TUBES FOR SERUM COLLECTION

PT/ PTT TUBES / CITRATE TUBES FOR PLASMA COLLECTION

HEMO REPELLENT COATED TUBE FOR SERUM COLLECTION

HEPARIN TUBE FOR PLASMA COLLECTION

EDTA TUBE FOR WHOLE BLOOD COLLECTION

GLUCOSE TUBES FOR PLASMA COLLECTION

• Conform to : ISO : 6710

ACCESSORIES

For Collection of Sharps

CARD BOARD SAFETY BOX SPECIFICATION:

- Volume - 5 ltr / 10 ltr.
- Material - Yellow Duplex Kraft Board
- Thickness of Walls - Over 1.10 mm
- Grammage - Over 850 gsm

FEATURES/BENEFITS:

- Easy Assembly without training
- Direction of use on the box in multilingual text as well as pictorial directions and sequenced code on flaps.
- Handle in the center avoids spillage/tilted Box during transportation.
- For Disposal -As per country specific waste disposal national policy guidelines.
- Seal edges with Adhesive Surgical Tape in case Box is intended to be used to collect Surgical Blades.
- PQS No. E010/006**
- Conforms to WHO standard WHO/PQS/E I O/SBO 1.1**

TECHNICAL DIMENSIONS FOR DISPOSABLE SHARP CONTAINER

VARIANT	HEIGHT	WIDTH	WEIGHT

For Preparation of
Skin Prior to Injection

DISPO CANN™ ALCOHOL SWAB

For Preparation of the Skin Prior to Injection

DESCRIPTION: Pre-Moistened Ready to Use High Quality Anti Septic Swabs

COMPOSITION:

Non-Woven Cellulose Swab, Swab Size: 30 x 60 mm
Isopropyl alcohol 70%, Double distilled water 30%, Non-Woven, Multi-layer laminated paper.

SHELF LIFE: Five years

GENERAL INTENDED USE

It is a single use device containing 70% isopropyl alcohol used for scrubbing and cleaning in order to disinfect needless access sites prior to use, to practice safer & more secure process for injection.

ACTIVE INGREDIENT: Saturated with 70% v/v Isopropyl alcohol

INACTIVE INGREDIENT: Purified water

INSTRUCTIONS FOR USE:

1. Wear the gloves
2. Grasp the packet where “Tear here” is noted and tear the pouch. This will open the product so the swab is easily retrieved.
3. Do not unfold the swab.
4. Hold swab between thumb and index finger.
5. Wipe the injection site vigorously.
6. Allow the prepare area to dry.
7. Discard after use as per state or country laws and rules and regulations.

CONTRAINDICATION: Do not apply on irritated or hypersensitive skin, cuts, burn, wound and on mucous membrane.

WARNINGS: For external use only. Do not use in eyes. Keep out of reach of children. If swallowed, Get medical help or contact a poison control center right away.

ACCESSORIES

FEATURES OF DISPOWAY STERILE SINGLE USE 3 WAY STOP COCK

- Lipid resistant
- With two female and one male luer lock port with caps
- Leak proof
- Secure fitment
- Transparent flow channel

INTENDED USE:

- For infusion of more than one fluid at a single time.

CAUTION:

- Reuse of product may lead to cross contamination / infection.
- The use of this product is restricted to qualified medical personnel.
- Store in clean, dry & insect free place.
- Avoid exposure to acidic / corrosive fumes.

CONTRAINDICATION:

- Product should not be used in patient with known hypersensitivity to any of material used.
(Material used : Poly propylene, polycarbonate & Poly ethylene)

SHELF LIFE:

- The shelf life of the product is 5 year from the date of manufacturing.
- Conforms to : ISO 8536-04 & ISO 8536-10 standards
